Name: Vadithe Usha Bai
Task: Create and Configure Cloud Storage on AWS S3
Platform Used: AWS S3
**Bucket Name:** codetech11
Sample File URL:
https://codetech11.s3.ap-south-1.amazonaws.com/honey.jpg

Steps Performed

1. Create an AWS account
2. Accessed S3 and Created a Bucket

3. Uploaded Example File

Uploaded a sample image file: honey.jpg

4. Configured Public Access
   S3 Bucket used "Bucket Owner Enforced" setting (ACLs disabled)
   Used **Bucket Policy** to allow public read access to all objects

5. Verified Access

Opened the URL: https://codetech11.s3.ap-south-1.amazonaws.com/honey.jpg

RESULT:
File was accessible in incognito mode, confirming success
